

OSCAR Dining Table

Assembly instructions

Basic  20-30
Minutes

Parts

Hardware

Item A - 1 x Threaded rod **Carton 2**

Item B - 1 x Locking nut **Carton 2**

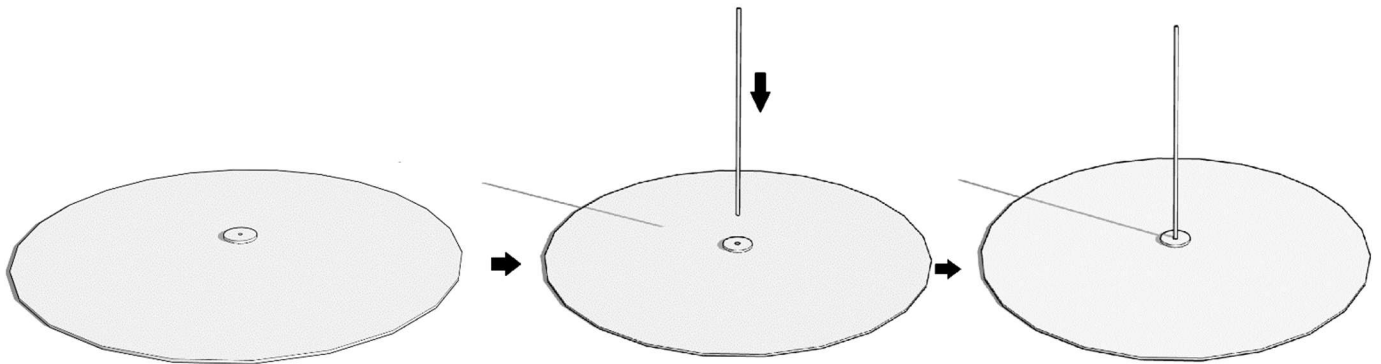

Item C - 1 x Spanner (Tube shaped) **Carton 2**

Assembly Stages

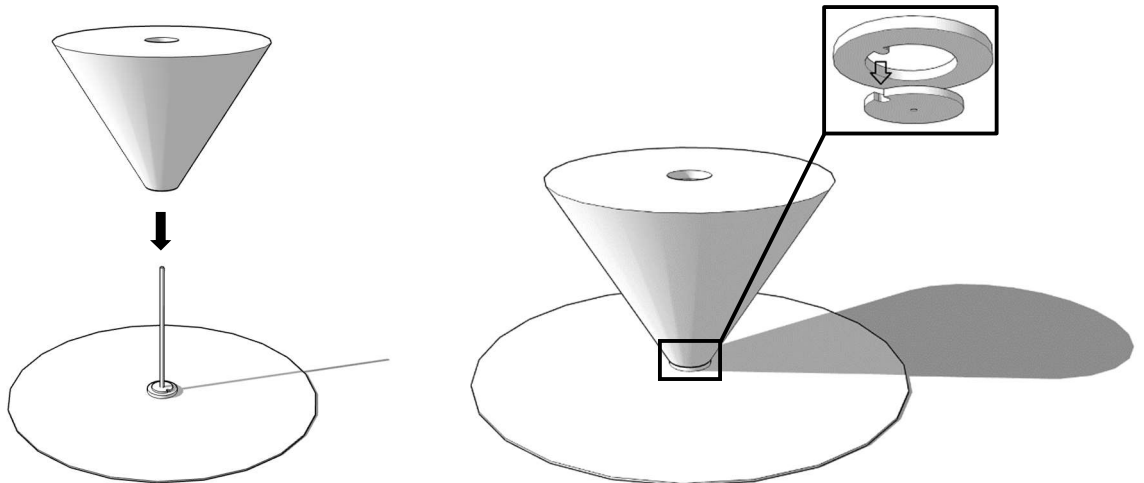

Stage 1

Lay the top upside down so the central fixing point is facing upwards. Take the threaded rod (**Item A**) and screw this into the fixing point on the top until it is tight and secure.

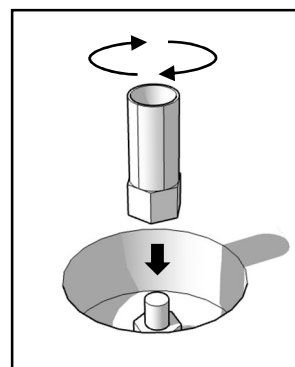

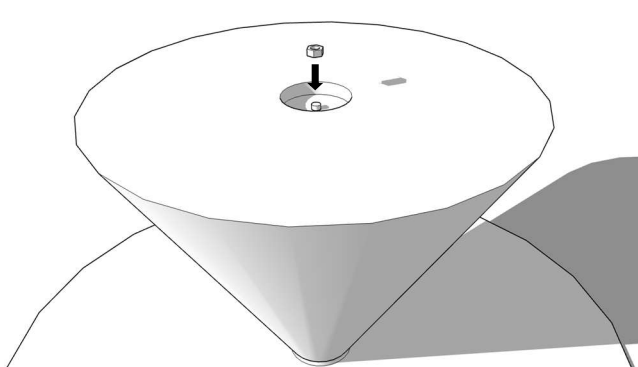

Stage 2

Take the **base** from Carton 2 and gently slide it over the threaded rod until it reaches the fixing point. Make sure the locking tooth on the base drops into its matching slot on the **Top**.

Stage 3

The final stage of assembly. Screw the **Locking nut (Item D)** onto the threaded rod and tighten with the **spanner (Item E)**.

Try not to over tighten this **Nut**.

The spanner has a small hole which allows you to put something in to act as lever.

Once the bolt has been fully tightened you can flip the table up the correct way (2-person job).
